Reverse tumbling action

Delicates setting

Auto cool down

BENEFITS

Around the clock freshness
Our reverse tumbling action switches directions between clockwise and anti-clockwise so your load dries quickly and evenly. Even once damp socks kidnapped into the corners of fitted sheets come out fresh.

Dry without damage
Our SensorDry technology detects when your load is dry enough and ends the cycle instead of just running on a set time, so that you end up with undamaged laundry that's not been over-dried.

Care at lower temperatures
Line dry only? Theres a Westinghouse appliance for that. Our dryers low/low setting low on tumble and low on heat means they're as protective as a parent on their teens first date.

Take a turn
The straightforward rotary dial means any household members big or small can help out on laundry day.

Retire the iron
Like a face cream for your clothes, our auto cool down reduces wrinkling and means your load is cool to touch when the program is finished.
