Separate Freezer	TwinTech Cooling System	Filtered ice and water	SnackZone
Holiday mode	Frost free Save your precious time with a freezer that doesn't ice up and need manual defrosting.	Slide Back and Flip Up Shelves	

BENEFITS

THE COMPLETE COOLING SOLUTION

Adapt your cooling to suit every type of food with the MultiSwitch convertible compartment. Simply choose one of five temperature settings between -23°C and 7°C to tailor the temperature to specific storage needs, and enjoy a variety of foods at their best, from cheese and deli meats, to cold drinks and ice-cream. Switch to -2°C to keep meat and fish ready to cook without freezing, so you will never have to defrost again.

ICE AND WATER ON DEMAND

Enjoy chilled water and cubed or crushed ice through the fridge door whenever you need a refreshing drink. You don't even have to compromise on storage space with the slim design.

EASY ACCESS WITH TWO DRAWERS

Simplify your storage with two separate drawers that bring comfort and convenience to your daily routine. The top drawer includes a fully convertible compartment that works as a fridge or freezer, while the lower drawer keeps frozen food neatly organised. The ergonomic design reduces bending and places everyday items within easy reach. By opening just one freezer drawer, the fridge maintains a stable temperature and reduces energy use.

PRESERVE FRESHNESS FOR LONGER

Helps keep your produce fresher for longer in the sealed GreenZone drawer. GreenZone and AutoHumidity work together to create the perfect environment by removing excess moisture, reducing condensation, and maintaining balanced humidity. Your fruits and vegetables stay crisp, flavourful, and ready to enjoy.

OPTIMAL COOLING AND FRESHNESS

TwinTech Cooling takes care of your ingredients with two separate cooling systems, one for the fridge and one for the freezer. You will enjoy stable temperature and humidity, while keeping odours from mixing between compartments. Helps your food stays fresher, and both flavours and textures remain exactly as they should be.

STAY FRESH WITH SMART CONTROL

With the Electrolux app, you can monitor and adjust the fridge temperature remotely to keep your produce in optimal condition. Set the MultiSwitch convertible zone from freezer to fridge while you are out buying drinks, so the right temperature is ready when you return. With five temperature settings ranging from -23°C to 7°C , you can store frozen food, chill drinks or preserve fresh ingredients effortlessly. Automatic push notifications remind you to close the door or change the water and air filter, giving you one less thing to think about.

Dimensions

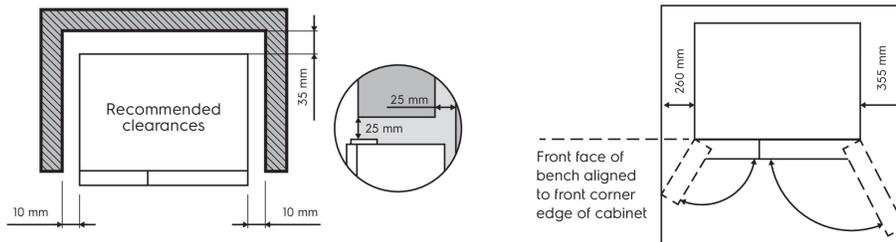

Dimension Guide

French door refrigerator

Model:
EHE6191BB

The diagram below shows the recommended airspace to allow for ventilation of your refrigerator.

When positioned in a corner area, spacing of right side at least 260 mm and left side at least 355 mm on the hinge side will allow the doors to open enough to enable the removal of bins and shelves.

Note: Doors are designed to sit proud of cabinetry (not flush). The clearances shown above are the recommended minimum clearances.

French door refrigerator	Door width (W)	Total depth (D)	Maximum height (H)	Cabinet width (W1)	Cabinet height (H1)	Cabinet depth (D1)	Depth door open 90° (D2)
EHE6191BB	913	746	1782	908	1756	625	1189

Please note! Dimensions to be used as a guide only. All customers MUST refer to the user manual supplied with the product for detailed installation instructions.
