

52cm integrated rangehood in dark stainless steel with inverter motor, Hob2Hood, and maximum airflow of 790 m3/hr.

Product Details

FEATURES

Inverter motor	790m3/hr powerful extraction	Hob2Hood technology	3 fan speeds plus PowerBoost
Delay off	Clean Filter indicator	LED lighting	Dishwasher safe filters

BENEFITS

THE QUIET ACHIEVER

Electrolux hoods with inverter technology remove cooking odours from your kitchen air at noise levels as low as 42 dBA*, so you can focus on cooking delicious dishes in a cleaner and quieter environment. Inverter motors are also more durable and energy efficient than traditional motors.*Based on internal test TR000071828/A

LET'S CLEAR THE AIR

Whether you're frying, searing or steaming, efficiently remove cooking vapours and odours from your kitchen in minutes. The powerful motor with high extraction airflow rate of 790m/hr* clears the air quickly and quietly.*Based on internal test TR000071828/A

The hands-free hood

When paired with a compatible Electrolux cooking hob, Hob2Hood automatically switches it on as you start cooking and adjusts the fan speed based on how you are using your hob. This means you can boil, sear or stir-fry without having to touch your hood with greasy fingers.

Extra extraction

When intensely fragranced foods such as onions and garlic hit smoking oil in the wok or pan, it's time to use PowerBoost. Simply increase the airflow for a minute to prevent strong odours from lingering.

Clear the kitchen air

When you are done cooking and activate the switch off the hood option, the hood will initiate the delay-off function, keeping the hood on for a little longer. With the built-in timer, the hood will continue to eliminate odours and ensure that your kitchen remains smelling fresh after you have finished cooking. So while you are eating, the hood will turn off automatically after 5 minutes.

LIGHT UP YOUR COOKING

Bright LED lighting allows you to clearly see what's cooking, helping you to adapt quickly to what's happening to the tastes and textures on your cooktop. It's also more energy efficient and environmentally friendly than traditional lighting.
