BENEFITS

NEXT-LEVEL BAKING WITH STEAM
With SteamBake, you can create bakery-style bread in your own home. The added steam allows dough to rise more effectively than conventional heating. The steam helps to create an exquisitely soft centre, while the combination of hot air delivers deliciously glossy crusts.

PROGRAM FOR PERFECTION
Select from a large range of programs, input the weight or insert the food probe, and let the oven do the rest. Whether you're cooking roast potatoes with crispy skins, tender steaks, succulent roast chicken, or pizza for a crowd, the oven will adjust the cooking function, time and temperature to deliver the best possible results, adding steam whenever necessary.

PRECISE COOKING, GREAT RESULTS
Whether you're broiling beef or roasting chicken, the food probe helps you to achieve delicious results, time after time. By monitoring the core temperature of the food during the cooking process, your meats will be cooked to their succulent best. The precise sensor will even let you know when your dishes have been cooked to the desired temperature and automatically stop the process to prevent food from drying out.

ASSISTED STEAM CLEANING
Cleaning your after cooking is no longer a chore with Steam Assisted cleaning. Add water to the bottom of the oven and steam will help to dissolve grease and grime, making it easier to wipe clean any residue from the oven's surfaces.

ACCESS ALL AREAS WITH EASE
Telescopic runners make it easy for you to slide trays in and out of the oven. This provides safe, effortless access, making it easier to baste during cooking or check on how a dish is coming along. The runners also make light work of lifting and removing hot trays or heavy dishes.

GENTLY OPENS. QUIETLY CLOSES.
The SoftMove door allows for an efficient and pleasant interaction with your oven. The door will maintain an angled open position if needed and will close softly and quietly with a gentle push.
