This product is entitled to Platinum Service, a premium offering to enjoy peace of mind after purchase. Benefit from a direct product replacement in the unlikely event of a major product fault. T&C's apply. Call the Platinum Service line on 1300 365 305

BENEFITS

More dust pick-up

With 33% more dust-up ability than the leading competitor*, UltraFlex has been designed to effectively remove dust and dirt. The twin inlet channels optimise airflow and suction whilst the turbo cyclone spins air at an impressive 140km/hr to efficiently separate the dust. Moreover, the unique inner flaps of the hose and an insulated motor allow UltraFlex to be quieter*** than the leading competitor.

Excellent filtration

Good filtration is not just about the HEPA filter, dust leakage can occur in other parts of the machine even if the vacuum uses the highest filter type. UltraFlex uses a range of HEPA filters in combination with a sealed filtration system to ensure dust or micro-particles don't leak at any point of their journey throughout the machine. The result, 99.99% of dust particles** and allergens are captured.

Innovative motorised PowerPro nozzle for extra power

The innovative PowerPro nozzle is the most powerful nozzle within the Electrolux range. Suitable for both hard floor and carpet, it features an excellent balance between motion resistance and dust pick up performance, making it very easy to glide on carpets of all thicknesses whilst ensuring top cleaning results. The nozzle can easily be adjusted to 4 different heights to suit different surfaces, it features front LED lights to brighten the cleaning path and it has an intelligent interface that highlights when it is time to change the brush roll. Ideal for deep cleaning and pet owners.

Unique FlexPro nozzle for narrow and tight areas

UltraFlex Animal Allergy Pro is the premium model within the UltraFlex range. It offers a great solution for allergy or asthma sufferers due to its excellent filtration, it includes the AeroPro Extreme nozzle for carpets and hard floors, as well as a turbo nozzle for pet hair removal. Additionally, it also includes the unique FlexPro nozzle. Ideal to clean edges, corners and underneath low furniture. With a slim design and 180 flexibility this nozzle can reach underneath furniture as low as 5cm off the floor and it can easily glide sideways.

Outstanding design

Offering a compact and light design UltraFlex is very easy to glide and store. Its front multi-directional wheel allows you to move the vacuum in any direction and its clip-on hose reduces storage space. UltraFlex can also be stored horizontally or vertically, giving you more flexibility. Lastly, UltraFlex has an extended cleaning reach of 12 metres to allow you to clean large areas without having to change power points.
